DETAILED ACTION

Drawings

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 140 (Fig. 1A), 160 (Fig. 1B), S309 (Fig. 3). Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 1-8 are objected to because of the following informalities:
- a. Claim 1, line 1, "resource" should be --resources--.
 - b. Claim 8, line 3, "resource" should be --resources--.
 - c. Claim 8, line 6, "the methods of" should be --the steps of--.
- Appropriate correction is required.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-8 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. Claims 1 and 8 disclose a method for adaptively allocating resources in a communication system. In order for a method to have patentable utility, it must include a practical application that produces a useful, concrete and tangible result (see MPEP 2106 II A). While the claims recite the selection of a modulation method, the claims do not recite that the selected modulation method is implemented to provide any tangible result, and thus the claims are considered to lack utility.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Li et al. U.S. Patent Application Publication 2006/0083210 discloses a method for subcarrier selection in an OFDMA system.
